

2nd International Analogy Conference

July 24-27, 2009

New Bulgarian University
Sofia, Bulgaria

Topics to be covered by the conference (not an exclusive list):

Computational models of analogy and its development
Neural basis of analogy and relational mapping
Integrated models of cognition with a focus on analogy
Analogical learning
Typical and atypical development of analogical thinking and relational mapping
The role of analogy in cognitive development
Comparative studies of relational processing abilities
Implicit and explicit analogizing, conscious and unconscious processes involved in analogical thinking
Analogy as a form of embodied cognition
Psychological studies of the interaction of analogy with other cognitive processes, including perception, learning, memory, decision making, problem solving, metaphor, and creative processes
Analogy in various domains (e.g., politics, science, religion, medicine, therapy, education, law, invention, design)

The St George Rotunda, Sofia

The Boyana church, Sofia

Deadline for submission: April 20th, 2009

Deadline for sumposia proposals: December 1st, 2008

Embracing events:

Summer School in Cognitive Science, Sofia, July 6-24, 2009

Cognitive Science Conference, Amsterdam, July 29-Aug 1
