

Come join our team!

Premier Research helps highly innovative biotech and specialty pharma companies transform life-changing ideas into reality.

At Premier, we never forget that what we do every day can significantly affect the lives and well-being of our customers, patients, physicians and our colleagues. Our Clinical Systems Analysts support a wide range of trials including those investigating vaccines and treatments for COVID-19. This role offers the great opportunity to make a dramatic impact on a devastating global pandemic.

Is this you or maybe the future you?

The **Associate Database Developer** is assisting with developing project databases, tools, and utilities using Clinical Data Management Systems and database platforms. In this role you will learn how a Clinical Trial Protocol gets integrated into an EDC database?

Requirements:

- Excellent verbal and written English
- Good technical Background and Computer literacy
- Any prior database related experience is a plus
- Basic understanding of SQL is a plus

This entry-level position is a great way to start your career on the technical side of clinical research!

How to apply? Send your CV in English to: stefan.georgiev@premier-research.com
