

Java Backend Developer

Want to be a part of a highly motivated and well-rewarded team?

TECHNOPOLIS is a leading chain of specialized hypermarkets for electrical and home appliances, office equipment and information technologies.

Thanks to its dynamic development, high quality of goods and exceptional standard of service we are currently undertaking a modernization of our IT architecture. We are looking to recruit new members for our team in the position of Java Backend Developers.

Our Key Requirements Are:

- Experience working with Java and Java EE
- Experience with the Spring framework
- Good knowledge of JSP, Ajax, TAG, JSON
- Knowledge and experience with relational databases (SQL, NoSQL, MySQL) and ORM
- Good knowledge of algorithms and data structures
- Strong experience in object-oriented development in design patterns
- Experience working with version control software such as Git and SVN
- Experience in CI/CD and Jenkins
- Excellent written and verbal communication in English
- Excellent written and verbal communication in Bulgarian

Considered An Advantage:

- Good understanding of software design and architecture including the ability to read, understand and follow architecture diagrams
- Experience in Front-end tools such as JavaScript/ TypeScript, ReactJS / Angular/ NodeJS, HTML, CSS
- Experience in SAP Hybris

What We Offer:

- Employment in a prestigious company with established standards of relationships, both with partners and employees
- Opportunity for training and professional development
- Friendly team-centric atmosphere
- A modern office in great location
- Fast-paced and constantly changing environment
- Additional social benefits - Health insurance, food vouchers, team events, corporal discount, etc.

We are looking for the missing pieces in our organization. If you are career-oriented, motivated, ambitious and a team player and you are looking for stability, professional growth and challenges, TECHNOPSIS is the place for you.

Please note that only the shortlisted candidates will be contacted.

Personal data of the applicants will be processed in strict confidentiality solely for the purposes of the selection and recruitment.
