Chibi Phoenix is the nest of talented people who share a passion for games, art, and excellence. The studio was formed in 2016, after more than 10 years of different experiences and projects.

We do gamification, video games, and art for clients from different areas: B2B educational games, igaming, art production for board games, to name only a few. Our portfolio also includes entertainment products such as the platform Amilova and Dragonball Multiverse: online communities devoted to comics, manga, indie artists and video games. Chibi Phoenix's complete network of products entertains over 500 million visitors monthly, with above 300,000 daily active players and a total of over 15 million registered players.

Chibi Phoenix is here to provide positive entertainment and support creative endeavors. We want to make the games we want to play and which make people laugh, make them fall in love with our characters, and feast their eyes with amazing art.

We are geeky, international, and fun. And we are constantly looking for new passionate professionals to join us in our adventure!
