

## Working Student AI (Global IT)

Working student position in **AI Enablement and Communication** focus on bridging the gap between technical AI development and practical, day-to-day business application. This role involve translating complex AI concepts (such as Generative AI) into easy-to-understand content, enabling employees to use new tools, and managing internal communications regarding AI strategy

### Key Responsibilities

- **Content & Documentation:** Creating user manuals, training materials, release notes, and newsletters for AI tools.
- **Internal Enablement:** Designing and organizing workshops, webinars, and training sessions to boost AI literacy.
- **Prompt Engineering & Testing:** Testing new AI applications (e.g., M365 Copilot, ChatGPT) and creating libraries of best practices and "Prompts-as-Code".
- **Communication:** Communicating product updates and AI use cases to employees to foster a culture of AI adoption.
- **Use Case Management:** Maintaining inventories of AI use cases and supporting projects in the AI Center of Excellence.

### Profile & Qualifications

- **Education:** Enrolled student in Business Informatics, Media Studies, Communication, Computer Science, or similar fields.
- **AI Knowledge:** Hands-on experience with GenAI tools (ChatGPT, Claude, Co-pilot).
- **Communication Skills:** Ability to translate technical content into user-friendly language, with strong English
- **Technical Tools:** Familiarity with M365 (SharePoint, PowerPoint) and collaboration tools
