

## **The Role**

The role is to be part of the Fund Data team at DETA Consulting. This team is responsible for sourcing and managing a large investment fund database for a London based fintech company. The database covers over 30,000 funds across the world, and we are looking to expand coverage and capability. It is ideal for a student in their last year of study or a recent graduate.

## **Main Tasks**

Validate data provided by third parties.

Optimize the information we receive (coverage, asset classes, etc.) by ensuring its quality - timeliness/completeness/accuracy.

Cooperate with external data providers (e.g. regulatory bodies, fund management companies).

Answer ad hoc customer queries relating to data (and make decisions on how to improve our data as a consequence).

## **Key Skills and Experience**

Excellent communication in English - both verbal and written – over 90% of the work is in English

MS Excel - intermediate level or above including, Pivot tables, Charting etc.

Knowledge of financial market and asset types will be an advantage

Experience and understanding of structured query language (SQL) and standard relational database structures is an advantage

Knowledge and experience with XML

Experience of analyzing large data sets

The ability to present complex information clearly in writing and speaking

Attention to detail

Ability to be proactive and self-reliant

Team player, flexible and able to work well with other groups
