

Rookie to Full-Stack Rockstar

Level up your software development skills while receiving a salary, working on real-time projects, and being mentored by top software experts in Bulgaria. Apply to join our remote DevCamp, which will start in February.

DevCamp is a 3-month training program, designed to provide tutoring on diverse software technologies to young talents ready to launch their careers as Full-Stack Web Developers, Mobile Developers, or Software Engineers in Test. It offers you the unique opportunity to build new technical skills, prove your software talent in a competitive environment, work on real projects, and join forces with some of the most intelligent and motivated fellows, as only the top 3% of software development talent in Bulgaria enter the program.

Being part of our DevCamp, you will

- Go through an intensive 12-week online training, starting on 22.02.2021
- Receive a salary while developing your programming skills full-time (Monday-Friday, 10 a.m.–7 p.m.)
- Learn to work with various web (Python, Ruby, Node.js, .Net, JavaScript, Vue.js) and mobile technologies (iOS, React Native) and become a Web Developer, Mobile Developer, or Software Engineer in Test, while also gaining full-stack expertise
- Be mentored by some of the most highly qualified MentorMate experts
- Improve your knowledge, your skills, and yourself
- Complete tasks. Meet new challenges. Work on individual and group projects using Scrum
- Prove yourself and become a part of MentorMate's team
- Join a culture that emphasizes hard work, leadership, and having fun

You need to have

- Good understanding of code and algorithms as well as strong analytical skills
- Passion to learn and a drive to work with diverse technologies
- Good communication and teamwork skills
- Ambition to take ownership of your work
- Proactive approach, asking questions and going beyond what's expected
- Desire to work with clients and to understand their ideas
- Excellent English skills

And here's how to apply

- [Sign up](#) for the program until 22.01.2021
- After signing up, you'll receive an assignment via email. You should build your solution with one of the following programming languages: JavaScript (any framework or library can be used), .NET, Java, Ruby, Python, PHP, Go, Swift, Objective C.
- We will expect to receive your solution within 7 days after the application

- Successfully completing the assignment, you'll be invited for an online test. There will be two test groups - one in January and one in February
- If you've passed the test, we'll organize an online interview with you, which will be held the week after the test
- The best of you will be invited to start the program on 22.02.2021
