

MA IN LINGUODIDACTICS (TAUGHT IN BULGARIAN)

Brief presentation of the program: the Master program of linguodidactics trains specialists who teach foreign languages. It examines contemporary linguodidactic theories and their practical application in the analysis of specific problems related to the teaching of foreign languages. Specialists meet the professional and intercultural competence and acquire the necessary knowledge and skills to improve their professional critical skills to their own work, as well as quick adaptation to the labor market. They have research skills that enable them to develop and participate in the research project and apply the results in their professional practice.

The program offers the opportunity for training of a master's degree in foreign language education for bachelors both from the philological as well as other fields of knowledge provided for the purpose of a program module.
